

  
**libreka!**  
books & ebooks

libreka! –  
leading platform for  
German ebooks

libreka! allows booksellers to virtually extend their shelf space by more than 100,000 books and offers a risk free and investment free entry into the evolving ebook market.

#### **A higher degree of sales competence**

The privileged booksellers' view offers access to the complete text of a book and thus ensures a genuine head-start for the booksellers in terms of information. By going beyond purely bibliographical research booksellers are well prepared for their customers' requests. libreka! enables book tracks by keywords, citations or just any word that might only appear once in the book. This dramatically reduces the need for copies on approval and significantly increases the likelihood of a purchase.

#### **libreka! on your own website**

With „libreka! link-up“ the full-text search can be integrated in a bookstore's website thus providing additional information and improving the likelihood of a purchase.

„Ebook-link“ allows booksellers who do not run an online-shop to connect libreka! to their websites. The libreka! search functionalities and the integrated ebook shop considerably expand the bookseller's portfolio.

#### **Selling libreka! ebooks via online-shops**

libreka!'s ebook repository functionality allows for seamless integration of the libreka! ebook-catalogue in existing booksellers' webshops. This way booksellers control the purchase process and improve their customer relations without the need to manage their own ebook warehouse.

#### **The unique revenue share model**

Enlisting as a partner-bookstore on [www.libreka.de](http://www.libreka.de) enables every bookseller to participate in the digital marketplace without any technical or financial investment. In this way, bookstores – both those with or without their own website – quite easily profit from ebook sales via [www.libreka.de](http://www.libreka.de).

#### **libreka! and German Books in Print (VLB)**

libreka! also improves research possibilities to all VLB users. libreka! is fully integrated in the VLB search thereby increasing the number of titles found and enabling a more detailed selection.

**libreka! means: better customer service and higher sales of ebooks and printed books.**

For publishers

libreka! is the innovative book trade solution for successful digital marketing of books – with decisive advantages for publishers.

#### **Maximum circulation**

By posting their titles in libreka! publishers significantly increase circulation of those titles and reach new target groups. Apart from full text search and indexing by standard search engines it is primarily the integration of libreka! in websites and online-shops which ensures libreka! titles being available everywhere. Furthermore, libreka! offers publishers a number of other possibilities.

#### **libreka! full text search on publisher's homepages**

libreka! link-up allows publishers to seamlessly integrate full text search for their catalogue's titles on their websites thereby creating more attractive websites.

#### **Ebook-sales via libreka!**

libreka! offers an easy access to digital sales channels for publishers. Without any major investments in infrastructure every publishing house can use libreka! as a direct sales channel to the reader.

#### **Data security**

libreka! ensures a maximum degree of security for all digital contents. And libreka! at all times maintains the appropriate security measures at the highest technical standards.

#### **Neutrality**

libreka! is independent and neutral, as it was initiated by the German Publishers and Booksellers Association. One of libreka!'s key principles is to give publishers full control of their rights and contents. Every publisher decides per title on the level of access to the content, protection measures and pricing of ebooks.

**libreka! acts as a one-stop-shop to maximise circulation and sales of books and ebooks. Once a book is on libreka! it is traceable on thousands of websites and all major search engines – and available as an ebook in more than a thousand online shops.**

libreka! is the leading book platform of the German-speaking world – with an extensive range of services: searching millions of pages, previewing any book and offering it as a book or ebook.

#### Perfect insight

libreka! helps readers to find exactly the book they are looking for. The browse function allows for refining the selection by categories whereas the search function discovers books by keywords. The libreka! search is the most powerful tool for discovering books – it finds every book regardless on which page or how many times the keyword appears.

#### Browsing

Titles can be searched from the first page to the last page and partially be read. Thus readers have the opportunity to see if a book corresponds to their expectations before buying it. Since many booksellers have already integrated libreka! into their online-shops, this form of access is also possible from thousands of other portals.

#### Buying

libreka! offers the widest selection of current German ebooks. And the number of ebooks is growing by the day. With the help of libreka! readers can find their favourite book, purchase the book or download it as an ebook.

**libreka! is the ultimate tool for any reader: helping to find exactly the right book, previewing it online and purchasing it as a printed book or ebook.**
